Direction (9-13): Read the given passage carefully and answer the questions that follow. Some words are printed in bold to help you locate them while answering some of these.

The future of technology in education is the cloud. Technology can often be a barrier to teaching and learning. Schools will only need one major thing to be prepared for the future. They will not need software installed, servers or local file storage. Schools will need a fastrobust internet connection. Infrastructure is paramount to the future of technology in education.

Teaching and learning is going to be social. Schools of the future could have a traditional cohort of students, as well as online only students who live across the country or even the world. Things are already starting to move this way with the emergence of massive open online courses (MOOCs). Teachers can use the cloud to set, collect and grade work online. Students will have instant access to grades, comments and work via a

computer, smartphone or tablet. Many schools are already doing this.

The cloud can also encourage independent learning. Teachers could adopt a flipped classroom approach more often. Students will take ownership of their own learning. Teachers can put resources for students online for students could be These use. videos. documents, audio podcasts or interactive images. All of these resources can be accessed via a student's computer, smartphone or tablet.

What we must remember is that when schools adopt new technology and services, they must be evaluated. This way, as a school, you know if they are successful and what improvements are needed. The staff will also need training, you can't expect staff to use new technology if they are not confident users or creators. Any initiative is doomed to failure without well trained, confident staff who can see how technology can support and benefit teaching and learning. Plenty of schools have already embraced this, but there's still a way to go to ensure all schools are ready for the future of technology. It is time for all schools to embrace the cloud. Source:

Reasoning

Direction (1-5): Study the following information carefully and answer the questions given below.

There are an uncertain number of people sitting in a row facing north. Two people sit between P and Q. S sits sixth to the left of Q and eighth from the extreme left end of the row. R sits fourth to the left of S. There are five people sitting between R and T. U sits to the immediate left of T. The number of people sitting between U and S is same as the number of people sitting between T and V. W sits seventh to the right of V and third from one of the extreme ends.

1. How many people are there in the row?

A. 18

B. 19

C. 20

D. 21

E. 22

Ans. C

2. What is the position of U from the left end?

A. 7th

B. 8th

C. 10th

D. 9th

E. 5th

Ans. D

3. If X sits second to the right of T, then how many people sit between X and Q?

A. 1

B. 2

C. 3

D. 4

E. 5

Ans. A

4. Who sits second to the left of T?

A. R

B. V

C. X

D. Q

E. S

Ans. E

5. Which of the following statement(s) is/are true?

I. T sits to the immediate right of V.

II. P sits fourth from one of the extreme ends of the row.

III. There is more than one person sitting between S and T.

A. Only I

B. Only II

C. Only I and II

D. Only II and III

E. All I, II and III

Ans. B

Direction (6-10): Study the following information carefully and answer the questions given below.

Ten people are sitting in two parallel rows having five people in each row, in such a way that there is an equal distance between adjacent persons. In row 1 - A, B, C, D and E are seated (but not necessarily in the same order) and all of them are facing north. In row 2 - P, Q, R, S and T are seated (but not necessarily in the same order) and all of them are facing south. Therefore, in the given seating arrangement, each member seated in a row faces another member of the other row.

E sits second from one of the extreme ends. Only one person sits between the one who faces E and P. R sits to the immediate right of P. As many people sit to the right of R as to the right of B. D sits second to the left of B. The one who faces D sits to the right of S. Two people sit between S and Q. The one who faces Q is an immediate neighbour of C.

6. Who amongst the following sits second to the left of the person who faces P?

A. C C. E B. D D. A

E. None of these

Ans. C

7. Four of the following five are alike in a certain way based on the given seating arrangement and thus form a group. Which is the one that does not belong to that group?

A. T C. A B. R D. D

E. Q

Ans. B

8. Which of the following is true regarding C?

A. C sits second to the left of E

B. C sits opposite to that of S

C. Three people sit between the one who faces C and T

D. Two people sit between C and D

E. None of these

Ans. D

9. Who amongst the following faces R?

A. C B. D C. A D. B

E. None of these

Ans. D

10. How many people sit between the one who faces Q and the one who faces S?

A. 1 B. 2 C. 3 D. 4 E. 5

Ans. B

Direction (11-13): In each of the questions, relationships between some elements are shown in the statements. These statements are followed by two conclusions numbered I and II. Read the statements and give the Answer.

11. Statements:

 $P < A < R \le V$; $J \le R > Z$

Conclusions:

I. J ≤ V

II. Z < P

A. Only conclusion I is true

B. Only conclusion II is true

C. Either conclusion I or conclusion II is true

D. Neither conclusion I nor conclusion II is true

E. Both conclusion I and II are true Ans. A

12. Statements:

 $Q = R > S = T \le U$

Conclusions:

I. T < Q

II. U ≥ R

A. Only conclusion I is true

B. Only conclusion II is true

C. Either conclusion I or conclusion II is true

D. Neither conclusion I nor conclusion II is true

E. Both conclusion I and II are true Ans. A

13. Statements:

 $A < B = C \le D$; B < K

Conclusions:

I. K > D

II. A < C

A. Only conclusion I is true

- B. Only conclusion II is true
- C. Either conclusion I or conclusion II is true
- D. Neither conclusion I nor conclusion II is true
- E. Both conclusion I and II are true Ans. B

Direction (14-18): Study the following information carefully and Answer the questions given below.

Eight people are sitting around a circular table facing towards the centre of the table. There are two people sitting between P and Q (either left or right). R sits to the immediate right of Q. S sits second to the left of R. There are three people sitting between S and T. U is an immediate neighbour of T. Three people are sitting between U and V. W sits second to the left of V.

14. How many people are sitting between S and W when counted from the left of S?

A. 1 B. 2 C. 3 D. 4

E. 5

Ans. B

15. What is the position of T with respect to R?

A. Immediate left

B. Immediate right

C. Second to the left

D. Second to the right

E. None of these

Ans. D

16. Who among the following are the immediate neighbours of W?

A. P, V B. T, U C. T, V D. P, U

E. T, P Ans. E

Ans. C

17. Four of the following five are alike in a certain way based on the given arrangement and hence form a group.

Which is the one that doesn't belong to that group?

A. PW B. QS C. UT D. RQ E. VP

18. Who sits to the immediate right of V?

B. P C. Q D. U

E. None of these

Ans. A

19. How many pairs of letters are there in the word 'PRODUCE' which have as many letters between them in the word (in both forward and backward directions) as they have between them in the English alphabetical series.

A. One B. Two

E. None Ans. A

Direction (20-22): Study the following information carefully and Answer the questions given below.

P is 20m to the west of Q. Q is 30m to the north of R. S is 15m west of R. T is 45m to the north of S. U is 15m to the south of P. V is 15m to the north of R.

20. What is the distance between U and ٧?

A. 10m C. 15m B. 5m D. 20m E. None of these

Ans. D

21. In which direction is point T with respect to point R?

A. North

B. North-west

C. South-east

D. South

E. None of these

Ans. B

22. If X is 5m to the east of P, then what is the distance between point X and point T?

A. 5m

B. 7m

C. 12m

D. 15m

E. 17m Ans. D

23. If it is possible to make a meaningful word, using the 2nd, 4th and 6th letters of the word 'UNILATERAL", then which letter is third letter from left of the word thus formed? If no such word is formed, mark the answer as 'X'. If more than one word can be formed mark the answer as 'Z'.
