Title: Princess myth, updated: Meghan Markle refuses the fairy tale script that bleaches out her color

The article at hand talks about the raging issue of deeply rooted racism in the British Royal family. While the Brexit vote highlighted one aspect of how bifurcated the British society is, the author believes many such cases highlight the same.

Hence, the British Royal family should have been a torchbearer in guiding the British society out of the clutches of such mentality.

It was expected that Meghan Markle's wedding to Prince Harry would have opened the doors for acceptance of people of color in the upper echelons of society.

However, Meghan's shocking revelation regarding the presence of racism in the British Royal family shut the door to any progress made in this regard.

This event has been in the air for a while now and Meghan's interview is surely going to add fuel to the fire. But while the British Royal family will not be impacted much by this, the author believes accepting Meghan would have been a progressive step for the Monarchy.
