# PPSC JE 

Civil Engineering

Mega Mock Test
(March 04th - March 05th 2022)

## Questions \& Answer Key

1．Select the related figure from the given alternatives．
Question Figures：

A．

B．

C．

D．

Ans．A
2．Select the mirror image of the given figure when the mirror is placed to the right of the figure．

## SECRETARY

A．YЯATHRJヨS
B．YЯАТЯЯСЭ己
C．YЯATHЯCHS
จ．ҮЯАТヨЯวヨટ

Ans．D
3．Direction：First 8 numbers， 1 to 8 ，are written from top to bottom．The letters of word＇Dear＇ are written in alphabetical order against each odd number．There are 2 letters between N and R．There are 3 letter between $G$ and I．G is above I．K is written against number 8．（No letter is repeated against any number）．
How many alphabets in English alphabetical series are there between the alphabets written against numbers 5 and 6？
A． 0
B． 1
C． 2
D． 3

Ans．D
4．Direction：In question below are given three or four statements followed by two or three conclusions numbered I，II and III．You have to take the given statements to be true even if they seem to be at variance with commonly known facts and then decide which of the given conclusions logically follows from the given statements，disregarding commonly known facts．

## Statements：

Some pens are stars．
All stars are snow．
No star is a moon．
Some moon are ears．

## Conclusion:

I. Some snow are moon.
II. At least some moon being snow is a possibility.
III. Some pen can never be ear, is a possibility.
A. All follow
B. Only I not follow
C. Only II and III not follows
D. Either I or II and III follow

Ans. B
5. Which of the following cube in the answer figure cannot be made based on the unfolded cube in the question figure?

A.

B.

C.

D.

Ans. B
6. If in the word 'BANQUET', all the vowels are changed to the next letter and all the consonants are changed to the previous letter. Which of the following letters is fourth from the right end?
A. P
B. A
C. $F$
D. $B$

Ans. A
7. Pointing to a woman, Nirmal said, "She is the only daughter of my wife's grandfather's only child". How is the woman related to Nirmal?
A. Wife
B. Sister-in-law
C. Sister
D. Data inadequate

Ans. A
8. A girl was 5 km away from her house towards North-West direction. A DOG was 3 km away towards North from the GIRL's house. Then she moved 3 km towards South and started standing towards west of the house. Again, the girl moved another 3 km towards south and started facing towards her house and the DOG came back to the house. What is the final distance between the DOG \& the GIRL and in which direction GIRL facing finally?
A. 5 km and North-East
B. 6 km and North
C. 10 km and East
D. None of these b

Ans. A
9. $K$ is more beautiful than $B$. B Is not as beautiful as $Y$.J is not as beautiful as $B$ or $Y$. Whose beauty is in the least degree?
A. B
B. J
C. Y
D. $K$

Ans. B
10. If ' + ' means ' $\div$ ', ' $\times$ ' means ' + ', ' - ' means ' $\times$ ' and $\div$ ', means ${ }^{\prime}-$ ', then which of the following equations is correct?
A. $36 \times 6+3-2<20$
B. $36 \times 6+3 \times 2>20$
C. $36+6 \times 3+2=20$
D. $36+6-3>2 \times 20$

Ans. B
11. A father's age is now three times that of his elder daughter. Five years back, his age was eight times that of his younger daughter. If the difference of ages of the two daughters is 5 years, what is the age of the father now?
A. 55
B. 50
C. 60
D. 45

Ans. D
12. Choose the correct figure that represents the given relation :

Mountains, Forests, Earth
A.

(1)
B.

(2)
C.

(3)
D.

(4)

Ans. B
13. $R, G, S, T$ are friend. $R$ is taller than $S$. $S$ is taller than $G$ who is smallest among $G$ and $T$. $T$ is taller than S . Who is the tallest among all of them?
A. R
B. $G$
C. S
D. $T$

Ans. A
14. If $10^{\text {th }}$ of a month falls after 3 days of Friday, then what day will be on $29^{\text {th }}$ of the same month??
A. Tuesday
B. Monday
C. Saturday
D. Thursday

Ans. C
15. Who won the 2021 Ryder Cup, which is a biennial men's golf competition?
A. United States
B. United Kingdom
C. Europe
D. China

Ans. A
16. Who has authored the book titled 'Human Rights and Terrorism in India'?
A. Subramanian Swamy
B. Subhashini Haider
C. M Venkaiah Naidu
D. Arun Kumar Mishra

Ans. A
17. Which power generating company has signed a Promoters Agreement with the Green Energy Development Corporation of Odisha (GEDCOL) for the development of 500 megawatts (MW) floating solar projects on different water bodies in the state?
A. NTPC Ltd
B. NHPC Ltd
C. Tata Power
D. Adani Power

Ans. B
18. 24th conference on e-Governance (NceG) was held in which city of India?
A. Bengaluru
B. Indore
C. New Delhi
D. Hyderabad

Ans. D
19. Panna national park is located in which state?
A. Karnataka
B. Uttar Pradesh
C. Madhya Pradesh
D. Jharkhand

Ans. C
20. What is the theme of the World Day for Audiovisual Heritage 2019?
A. Protect and Share Your Visual Story
B. Engage the Past Through Sound and Image
C. It's Your Story - Don't lose it
D. Discover, Remember and Share

Ans. B
21. The body is sometimes acted by two or three force members and we need to find the moment of inertia for the same. The difference between the two and the three force members is:
A. The former is collinear and the latter is parallel
B. The former is parallel and the latter is perpendicular
C. The former is perpendicular and the latter is collinear
D. The former is acting on two points in the body while the latter is on three points

Ans. D
22. When the strain in a material increases with time under sustained constant stress, the phenomenon is known as:
A. Strain hardening
B. Hysteresis
C. Creep
D. Visco-elasticity

Ans. C
23. Two bars of different materials and same size are subjected to the same tensile force. If the bars have elongation in the ratio of $3: 7$, then the ratio of modulus of elasticity of the two materials will be
A. 3:7
B. $7: 3$
C. $7: 4$
D. $4: 7$

Ans. B
24. The material of a rubber balloon has a Poisson's ratio of 0.5 . If uniform pressure is applied to blow the balloon, the volumetric strain of the material will be
A. 0.50
B. 0.25
C. 0.20
D. Zero

Ans. D
25. A straight wire 15 m long is subjected to tensile stress of $2000 \mathrm{~kg} / \mathrm{cm}^{2}$. Elastic modulus is 1.5 $\times 10^{6} \mathrm{kgf} / \mathrm{cm}^{2}$. Coefficient of linear expansion for a material is $16.66 \times 10^{-6} /{ }^{0} \mathrm{~F}$. The temperature change (in ${ }^{0} \mathrm{~F}$ ) to produce the same elongation as due to $2000 \mathrm{~kg} / \mathrm{cm}^{2}$ tensile stress in the material is:
A. 40
B. 80
C. 120
D. 160

Ans. B
26. A thin spherical shell of wall thickness 4 mm and internal diameter 400 mm is subjected to an internal pressure of $5 \mathrm{~N} / \mathrm{mm}^{2}$. The hoop stress exerted by the thin shell is
A. 62.5 MPa
B. 100 MPa
C. 125 MPa
D. 250 MPa

Ans. D
27. Calculate degree of freedom for the given frame. Consider the members are inextensible.

A. 3
B. 4
C. 6
D. 7

Ans. B
28. The slope deflection equation for part $B C$ of the beam, shown below, is

A. $M_{B C}=M_{F B C}+\frac{2 E I}{L}\left(2 \theta_{B}+\theta_{C}\right)$
B. $M_{B C}=M_{F B C}+\frac{E I}{L}\left(2 \theta_{B}+\theta_{C}\right)$
C. $M_{B C}=M_{F B C}+\frac{2 E I}{L}\left(2 \theta_{C}+\theta_{B}\right)+\frac{1}{2} M_{F B A}$
D. $M_{B C}=M_{F B C}+\frac{E I}{L}\left(2 \theta_{C}+\theta_{B}\right)+\frac{1}{2} M_{F B A}$

Ans. B
29. As the span of a bridge increases, the impact factor $\qquad$ .
A. decreases
B. increases
C. remains constant
D. increases up to a critical value of span and then decreases

Ans. A
30. A riveted joint may experience
A. shear failure
B. Shear failure of plates
C. bearing failure
D. All option are correct

Ans. D
31. The slenderness ratio of lacing bars should not exceed
A. 100
B. 120
C. 180
D. 145

Ans. D
32. The maximum allowable percentage of compression reinforcement of RC beam is
A. 0.87 fy
B. 0.45 fy
C. $4 \%$
D. $2 \%$

Ans. C
33. The magnetic bearing of a line (AB) is $110^{\circ} 45^{\prime}$. If magnetic declination is $10^{\circ} 05^{\prime} \mathrm{E}$, then what is the true bearing of the line $A B$ ?
A. $115^{\circ}$
B. $118^{0} 45^{\prime}$
C. $120^{\circ} 50^{\prime}$
D. $122^{\circ} 5^{\prime}$

Ans. C
34. The whole circle bearings of line $O A$ and $O B$ are $18^{\circ} 15^{\prime}$ and $335^{\circ} 45^{\prime}$ respectively. What is the value of included angle AOB?

A. $42^{\circ} 30^{\prime}$
B. $132^{\circ} 15^{\prime}$
C. $354^{\circ} 30^{\prime}$
D. $177^{\circ} 15^{\prime}$

Ans. A
35. The fore bearing of a line is 30 degree. Calculate the back bearing of a line (in degree).
A. 60
B. 120
C. 210
D. 330

Ans. C
36. What is the degree of the curve (in degree) for a radius of 573 m using chain of 20 m length?
A. 1
B. 2
C. 3
D. 5

Ans. B
37. The line which is used to collect the details of the objects in an area is called $\qquad$ .
A. base line
B. check line
C. main line
D. tie line

Ans. D
38. Widening of gauge is provided if degree of the curve is
A. $3^{\circ}$ or less
B. $3^{\circ}$ to $3.5^{\circ}$
C. more than $4.5^{\circ}$
D. None of these

Ans. C
39. In chain survey execution, the first step taken is $\qquad$ .
A. Reference sketches
B. Marking stations
C. Running survey line
D. Reconnaissance

Ans. D
40. Relative error of the closer is the ratio of $\qquad$ .
A. closing error to sum of departure
B. closing error to sum of latitude
C. closing error to perimeter of travers.
D. latitude to departure

Ans. C
41. Calculate the whole circle bearing of a line, it its reduced is $\mathrm{N} 30^{\circ} \mathrm{W}$
A. $30^{\circ}$
B. $330^{\circ}$
C. $\mathrm{N} 30^{\circ} \mathrm{W}$
D. $\mathrm{S} 60^{\circ} \mathrm{W}$

Ans. B
42. In a closed traverse $\qquad$ .
A. difference between fore-bearing and back-bearing should be $90^{\circ}$
B. sum of included angles should be ( $2 \mathrm{~N}-4$ ) times right angle, where N represents the number of sides
C. sum of included angles should be ( $2 \mathrm{~N}-1$ ) times right angle, where N is the number of sides
D. None of these

Ans. B
43. Invar tapes are made of an alloy of $\qquad$ .
A. Nickle and steel
B. Copper and steel
C. Tin and steel
D. Aluminium and steel

Ans. A
44. For a satisfactory workable concrete with a constant W.C. ratio increase in aggregate cement ratio
A. Increases the strength of concrete
B. Decreases the strength of concrete
C. No effect on the strength of concrete
D. None of these

Ans. B
45. The standard size of brick as per Indian standards is $\qquad$ .
A. $20 \mathrm{~cm} \times 10 \mathrm{~cm} \times 10 \mathrm{~cm}$
B. $23 \mathrm{~cm} \times 12 \mathrm{~cm} \times 8 \mathrm{~cm}$
C. $19 \mathrm{~cm} \times 9 \mathrm{~cm} \times 9 \mathrm{~cm}$
D. $18 \mathrm{~cm} \times 9 \mathrm{~cm} \times 9 \mathrm{~cm}$

Ans. C
46. Proper proportioning of concrete, ensures $\qquad$ .
A. desired strength and workability
B. desired durability
C. water tightness of the structure
D. All options are correct

Ans. D
47. While compacting the concrete by a mechanical vibrator, the slump should not exceed. $\qquad$ cm .
A. 2.5
B. 5.0
C. 7.5
D. 10

Ans. B
48. As per IS 456 : 2000, for sea water, grade of concrete lesser than which of the following shall not be used in reinforced concrete:
A. M20
B. M30
C. M35
D. M40

Ans. B
49. The specific gravity of asbestos is
A. 2.65
B. 286
C. 3.10
D. 3.50

Ans. C
50. Fly ash is obtained from
A. The distillation of petroleum
B. The burning of coal
C. The combustion of iron
D. None of the above

Ans. B
51. Fly ash can be utilised in manufacturing of
A. Cellular concrete blocks
B. Bricks
C. Concrete
D. All of the above

Ans. D
52. Pozzolana react with $\qquad$ in the presence of water to form cementitious material?
A. $\mathrm{CaCl}_{2}$
B. $\mathrm{CaCO}_{3}$
C. $\mathrm{Ca}(\mathrm{OH})_{2}$
D. $\mathrm{Mg}(\mathrm{OH})_{2}$

Ans. C
53. Le Chatelier's device is used for determining the:
A. Setting time of cement
B. Soundness of cement
C. Tensile strength of cement
D. Compressive strength of cement

Ans. B
54. What is the water-cement ratio (w/c) required to complete the reactions in hydration of cement?
A. 0.15 to 2.0
B. 0.20 to 0.30
C. 0.35 to 0.45
D. 0.50 to 0.65

Ans. C
55. What is the temperature range in the cement kiln?
A. 800 to $1050^{\circ} \mathrm{C}$
B. 1050 to $1300^{\circ} \mathrm{C}$
C. 1300 to $1500^{\circ} \mathrm{C}$
D. 1800 to $2100^{\circ} \mathrm{C}$

Ans. C
56. In PERT analysis the probability distribution followed by the activity and the project is
A. Gaussian and $\beta$-distribution respectively
B. Normal and exponential distribution respectively
C. $\beta$-distribution and gaussian distribution respectively
D. exponential and normal distribution respectively

Ans. C
57. When actual cost of construction plus certain profit is paid to the contractor then such a contract is known as $\qquad$ _.
A. Unscheduled contract
B. Nominated contract
C. Cost plus percentage contract
D. Work order

Ans. C
58. Which of the following Tax generally not applicable to residential building is?
A. Sales tax
B. Property tax
C. Wealth tax
D. Municipal tax

Ans. A
59. What is the approximate cost of the complete labour as a percentage of the total cost of the building?
A. 0.1
B. 0.25
C. 0.4
D. 0.05

Ans. B
60. The quantity cement concrete damp-proofing course is measured in terms of $\qquad$ .
A. m
B. $\mathrm{m}^{2}$
C. $\mathrm{m}^{3}$
D. lump sum

Ans. B
61. Sensitivity analysis is a study of
A. Comparison of profit and loss
B. Comparison of assets and liabilities
C. Changes in output due to change in input
D. Economics of costs and benefits of the project

Ans. C
62. For estimation of the brick masonry, no deduction is made for the end of the rafter up to the area (square inch) of
A. 50
B. 72
C. 108
D. 44

Ans. B
63. Which of the following is a factor for obsolescence of the property?
A. New invention
B. Improvement in design
C. Outdated design and structure
D. All option are correct

Ans. D
64. Given for a sample of river sand:

Void ratio at the densest state $=0.35$
Void ratio at loosest stage $=1.1$
Which one of the following correctly represents the relative density of the sample prepared with a void ratio of 1.0 ?
A. $12.5 \%$
B. $25 \%$
C. $75 \%$
D. $13.33 \%$

Ans. D
65. Pick up the correct statement from the following
A. Sand obtained from pits, is washed to remove clay and silt
B. Sand obtained from flooded pits, need not be washed before use
C. Sea shore sand contains chlorides which cause efflorescence
D. All option are correct

Ans. D
66. A loose uniform sand with rounded grains has effective grain size of 0.05 cm . Co-efficient of permeability of the sand is $\qquad$ —.
A. $0.25 \mathrm{~cm} / \mathrm{sec}$
B. $0.5 \mathrm{~cm} / \mathrm{sec}$
C. $1 \mathrm{~cm} / \mathrm{sec}$
D. $1.25 \mathrm{~cm} / \mathrm{sec}$

Ans. A
67. The lime stabilization is very effective in treating
A. Sandy soils
B. Silty soils
C. Non-plastic soils
D. Plastic clayey soils

Ans. D
68. Which of the following soils has the uniformity coefficient of more than 10 ?
A. Well graded soil
B. Coarse soil
C. Uniform soil
D. Poor soil

Ans. A
69. A soil has a bulk density of $22 \mathrm{KN} / \mathrm{m}^{3}$ and water content $10 \%$. The dry density of soil in $\mathrm{kN} / \mathrm{m}^{3}$ is
A. 18.6
B. 20.0
C. 22.0
D. 23.2

Ans. B
70. Which one of the following is the best method for the stabilization of the clayey subgrade in water logged area?
A. Cement stabilization
B. Lime stabilization
C. Bitumen stabilization
D. Stabilization by grouting

Ans. B
71. Given that for a sample

Critical void ratio $=0.50$
Initial void ratio $=0.60$
If the sand sample is subjected to continued shear, its volume will:
A. Increase
B. Decrease
C. Not change
D. Initially increase and then decrease

Ans. B
72. Given for a soil stratum:

Coefficient of permeability in horizontal direction $=3 \mathrm{~m} /$ day
Coefficient of permeability in vertical direction $=1 / 3 \mathrm{~m} /$ day
The effective permeability of the stratum is
A. $0.6 \mathrm{~m} /$ day
B. $1.0 \mathrm{~m} /$ day
C. $1.33 \mathrm{~m} / \mathrm{day}$
D. $1.66 \mathrm{~m} / \mathrm{day}$

Ans. B
73. In a three-layered soil, water flows parallel to stratification. The thickness of the middle layer is twice that of top and bottom layer. The coefficient of permeability of middle layer ( 2 k ) is twice that of top and bottom layer (k). What is the average coefficient of permeability for this flow?
A. $k$
B. 1.33 k
C. 1.5 k
D. 0.66 k

Ans. C
74. A clear dry sand sample is tested in a direct shear test. The normal stress and the shear stress at failure are both equal to $120 \mathrm{kN} / \mathrm{m}^{2}$. The angle of shearing resistance of the sand will be:
A. $25^{0}$
B. $35^{\circ}$
C. $45^{\circ}$
D. $55^{\circ}$

Ans. C
75. In extended aeration process, the system works in which phase?
A. stationary
B. endogeneous
C. log phase
D. all of these

Ans. B
76. Anaerobic treatment is best suited for $\qquad$ _.
A. High efficiency
B. Toxic wastes
C. Dilute inorganic wastes
D. Strong organic wastes

Ans. D
77. What is the maximum permissible limit of fluoride in drinking water?
A. $1.2 \mathrm{mg} / \mathrm{l}$
B. $1.5 \mathrm{mg} / \mathrm{l}$
C. $3 \mathrm{mg} / \mathrm{l}$
D. $0.5 \mathrm{mg} / \mathrm{l}$

Ans. B
78. For a design of a storm sewer in a drainage area, if the time of concentration is 20 minutes, then the duration of rainfall is taken as:
A. 10 min
B. 20 min
C. 30 min
D. 40 min

Ans. B
79. For a water sample the total hardness is $200 \mathrm{mg} / \mathrm{l}$ as $\mathrm{CaCO}_{3}$ and alkalinity is $250 \mathrm{mg} / \mathrm{l}$ as $\mathrm{CaCO}_{3}$. Then the carbonate hardness is
A. 200
B. 250
C. 450
D. 50

Ans. A
80. Which of the following do not represent direct health threat?
A. Nitrate
B. Fluorides
C. Phosphates
D. Sulphate

Ans. C
81. If waste is fairly biodegradable and can be effectively treated biologically, then
A. $B O D / C O D=0$
B. $B O D=C O D=0$
C. $\mathrm{BOD} / \mathrm{COD} \leq 0.2$
D. $B O D / C O D \geq 0.6$

Ans. D
82. Potassium dichromate is used for measuring
A. Oxygen equivalent of organic matter
B. Nitrogen content
C. Chloride content
D. Sulphide content

Ans. A
83. For optimum digestion, $\mathrm{C} / \mathrm{N}$ ratio of the material should be between
A. $10-30$
B. 20-40
C. $30-50$
D. $40-60$

Ans. C
84. Rainfall hyetograph shows the variation of $\qquad$ .
A. Cumulative rainfall with time
B. Rainfall intensity with time
C. Rainfall depth over an area
D. Rainfall intensity with time cumulative rainfall

Ans. B
85. The number of unit hydrographs needed to produce S -curve is
A. $\frac{1}{D}$
B. $\frac{T_{B}}{D}$
C. $\frac{D}{T_{B}}$
D. $T_{B} D$

Ans. B
86. Transpiration is measured by
A. Tensiometer
B. Phytometer
C. Lysimeter
D. Psychrometer

Ans. B
87. A 6 hours storm had 6 cm of rainfall and the resulting direct runoff was 3 cm . If the $\Phi$-index remains at the same value, direct runoff due to 20 cm of rainfall in 12 hours in the catchment is
A. 120 mm
B. 130 mm
C. 140 mm
D. 150 mm

Ans. C
88. For a catchment with an area of $600 \mathrm{~km}^{2}$ the equilibrium discharge of an S -curve obtained by 6 -hour unit hydrograph in $\mathrm{m}^{3} / \mathrm{sec}$ is
A. 277.8
B. 377.8
C. 177.8
D. None of the above

Ans. A
89. The dickens formula for maximum flood discharge Q is
A. $C_{D} A^{3 / 4}$
B. $\frac{C_{D}}{A^{a / 4}}$
C. $C_{D} A^{1 / 2}$
D. $\frac{C_{D}}{A^{1 / 4}}$

Ans. A
90. The intensity of the rainfall for successive 1 hours period of a 6 hours storm are $2,6,8,9,7$ and $3 \mathrm{~cm} / \mathrm{hr}$. The runoff is $4 \mathrm{~cm} / \mathrm{hr}$. Calculate the $\varphi$-index ( $\mathrm{cm} / \mathrm{hr}$ ).
A. 2.5
B. 3.5
C. 4.6
D. 7.67

Ans. B
91. If the specific retention is $10 \%$ and the specific yield of the $100 \mathrm{~km}^{2}$ alluvial basin is 0.15 . What is the porosity of the soil?
A. 0.25
B. 0.35
C. 0.15
D. 0.10

Ans. A
92. At Delhi, a maximum rainfall depth of 15 cm in 12 h has a return period of 50 years. The probability of a 12 h rainfall of magnitude equal to or greater than 15 cm will occur in the next year
A. 0.50
B. 0.33
C. 0.98
D. 0.02

Ans. D
93. If the initial infiltration capacity was $10 \mathrm{~mm} / \mathrm{hr}$ and ultimate capacity was $1.2 \mathrm{~mm} / \mathrm{hr}$. The total of 33 mm of water infiltrated during 10 h interval. Find infiltration constant rate. ( Assume steady state is attained)
A. $0.42 h^{-1}$
B. $0.36 \mathrm{~h}^{-1}$
C. $0.32 \mathrm{~h}^{-1}$
D. $0.27 \mathrm{~h}^{-1}$

Ans. A
94. Calculate the runoff ( cm ) from a rainfall of 3 hours. The intensity of the rainfall is $2 \mathrm{~cm} / \mathrm{hr}$. The evaporation and infiltration losses are 8 mm and 16 mm respectively.
A. 1.2
B. 2.8
C. 3.6
D. 6.8

Ans. C
95. Available moisture is the difference in water content of soil between field capacity and
$\qquad$ -.
A. gravitational water
B. permanent wilting point
C. saturation capacity
D. ultimate wilting point

Ans. B
96. The canal fall involving parabolic glacis is called as:
A. Straight glacis fall
B. Glacis fall
C. Inglis fall
D. Montague fall

Ans. D
97. Hydrodynamic pressure due to earthquake acts at a height of
A. $3 \mathrm{H} / 4 \mathrm{n}$ above the base
B. $3 \mathrm{H} / 4 \mathrm{n}$ below the water surface
C. $4 \mathrm{H} / 3 \mathrm{n}$ above the base
D. $4 \mathrm{H} / 3 п$ below the water surface

Ans. C
98. The field capacity of a soil is $25 \%$, its permanent wilting point is $15 \%$ and specific dry unit weight is 1.5 . If the depth of root zone of a crop is 80 cm , the storage capacity of the soil is
$\qquad$ .
A. 8 cm
B. 10 cm
C. 12 cm
D. 14 cm

Ans. C
99. The field irrigation requirements is computed as $\qquad$ .
A. Consumptive use + field application losses
B. Net irrigation requirement + field application losses
C. Net irrigation requirement + conveyance losses
D. Consumptive use + conveyance losses

Ans. B
100. A $60 \%$ index of wetness means
A. rain excess of $40 \%$
B. rain deficiency of $40 \%$
C. rain deficiency of $60 \%$
D. none of the above

Ans. B
101. The load on a hydel plant varies from a minimum of $10,000 \mathrm{~kW}$ to a maximum of $33,000 \mathrm{Kw}$. Two turbo-generators of capacities $22,000 \mathrm{~kW}$ each have been installed. The Utilization factor will be
A. 0.65
B. 0.44
C. 0.75
D. 0.33

Ans. C
102. If a drainage basin of $2 \mathrm{sq} . \mathrm{km}$ area has an axial length of 1 km , then the form factor of the basin will be,
A. 6.0
B. 4.0
C. 2.0
D. 1.0

Ans. C
103. Calculate the critical velocity ( $\mathrm{m} / \mathrm{sec}$ ) of a channel using Kennedy's theory, if the depth of flow is 3 m .
A. 0.84
B. 1.11
C. 2.7
D. 6

Ans. B
104. The intensity of irrigation means
A. percentage of culturable command area to be irrigated annually
B. percentage of gross command area to be irrigated annually
C. percentage of the mean of culturable command area and the gross commanded area to be irrigated annually
D. total depth of water supplied by the number of waterings

Ans. A
105. A sprinkler irrigation system is suitable when
A. the land gradient is steep and the soil is easily erodible
B. the soil is having low permeability
C. the water table is low
D. the crops to be grown have deep roots

Ans. A
106. Check flooding method of irrigation can be used for
A. Less permeable soils.
B. More permeable soils.
C. Both more permeable and less permeable soils.
D. Rolling lands only.

Ans. C
107. Pitot tube is used to measure $\qquad$ .
A. Discharge
B. Average velocity
C. Velocity at a point
D. Pressure at a point

Ans. C
108. Calculate the kinematic viscosity (stoke) of the fluid, if the dynamic viscosity of fluid is 0.5 poise and specific gravity is 0.4 ?
A. 0.95
B. 1
C. 1.25
D. 1.5

Ans. C
109. $92 \%$ of iceberg volume is below surface and only $8 \%$ is visible above surface, Find ( $\rho_{\text {iceberg }}$ ) density of iceberg if density of seawater ( $\rho_{\text {seawater }}$ ) is $1025 \mathrm{~kg} / \mathrm{m}^{3}$ ?
A. $943 \mathrm{~kg} / \mathrm{m}^{3}$
B. $927 \mathrm{~kg} / \mathrm{m}^{3}$
C. $1027 \mathrm{~kg} / \mathrm{m}^{3}$
D. None of the above

Ans. A
110. In which of the following unit kinematic viscosity of fluid is measured?
A. $\mathrm{m} / \mathrm{s}$
B. $\mathrm{m} / \mathrm{s}^{2}$
C. dyne
D. stokes

Ans. D
111. Euler's equation for motion of liquids is based on the assumption that the $\qquad$ .
A. flow acoss streamline
B. flow takes place continuously
C. flow is homogeneous, non-viscous and incompressible
D. flow is turbulent

Ans. C
112. Which of the following fluids can be classified as non-Newtonian?
A. Kerosene oil and Diesel oil
B. Human blood and Toothpaste
C. Diesel oil and Water
D. Kerosene and Water

Ans. B
113. If the velocity gradient is given by $\theta$ and dynamic viscosity of the fluid is given by $\mu$. What is the shear stress on the wall of the boundary layer in the direction of motion?
A. $\mu \theta$
B. $\mu+\theta$
C. $\mu / \theta$
D. $\theta / \mu$

Ans. A
114. If the stream function is $\Psi=3 x^{2}-4 y^{2}$, Then what is the magnitude of velocity at point $(2,2)$ ?
A. 12
B. 20
C. 40
D. 16

Ans. B
115. The runaway speed of a turbine is $\qquad$ .
A. The actual running speed at design load
B. The synchronous speed of the generator
C. The speed attained by the turbine under no load condition
D. The speed of the wheel when governor fails

Ans. C
116. A ship's model of scale $1: 100$ had a wave resistance of 1 N at its design speed. The corresponding wave resistance (in N ) in prototype will be $\qquad$ .
A. 100
B. 10000
C. 1000000
D. 1000

Ans. C
117. In the selection of turbine by specific speed or head, which one of the following statements is not correct?
A. For specific speed 10-35, Kaplan turbines
B. For specific speed 60-300, Francis turbines
C. For head 60-250 m, Francis turbines
D. For head above 300 m, Pelton wheel

Ans. A
118. The maximum number of jets generally employed in an impulse turbine without jet interference is
A. 2
B. 6
C. 4
D. 8

Ans. B
119. Which of the following inferences is not drawn by studying performances curves of centrifugal pumps?
A. Discharge increases with speed.
B. Power decrease with speed.
C. Head increases with speed.
D. Manometric head decreases with discharge.

Ans. B
120. The centrifugal pump should be installed above the water level in the sum such that
A. its height is not more than 1.03 m at room temperature of liquid
B. its height is not allowed to exceed 6.7 m
C. the negative pressure does not reach as low as the vapour pressure
D. None of these

Ans. C
