Section : Mental Ability

Q.1 In a code language, JOYFUL is written as 534, how will PLAYER be written in that language?

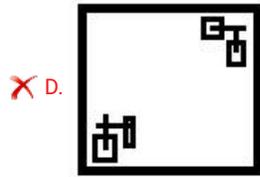

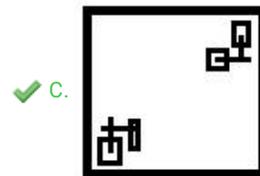

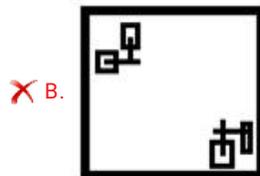

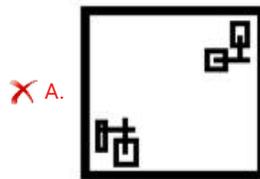

- Ans A. 430
 B. 488
 C. 462
 D. 451

Question ID : 1841223501

Q.2 Select the figure that will replace the question mark (?) in the following figure series.

Ans

Question ID : 1841223508

Q.3 If $S < H = M > T$ and $M < P < D$ then which of following is correct?

Ans A. $M > D$

B. $S = M$

C. $S < P$

D. $H > D$

Question ID : 1841223498

Q.4 Three of the following four word-pairs are alike in some manner and one is different. Identify the one which is different.

Ans A. Crocodile : Reptile

B. Elephant : Mammal

C. Frog : Amphibian

D. Snail : Fish

Question ID : 1841223507

Q.5 Three of the following four letter-clusters are alike in some manner and one is different. Identify the one which is different.

- Ans A. RUXAC
 B. EHKNQ
 C. TWZCF
 D. KNQT W

Question ID : 1841223506

Q.6 Select the option that is related to the third term in the same way as the second term is related to the first term.

MTE : NGV :: PDX : _____

- Ans A. KWC
 B. KVD
 C. SXB
 D. LWC

Question ID : 1841223505

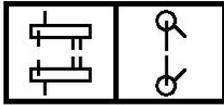

Q.7 Select the letter cluster that will replace the question mark (?) in the following series.

HQT, KUY, NYD, QCI, ?

- Ans A. TFL
 B. TGN
 C. SGN
 D. TFM

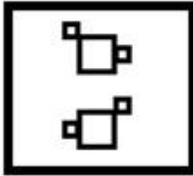

Question ID : 1841223499

Q.8 Select the figure amongst the option figures which has the same characteristics as the two figures given below.

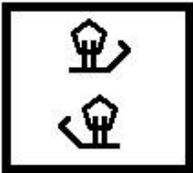

Ans

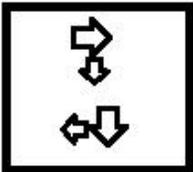

✗ A.

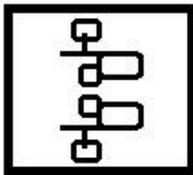

✗ B.

✗ C.

✓ D.

Question ID : 1841223510

Q.9 Which two numbers should be interchanged to make the given equation correct?

$$20 \times 8 + 16 \div 4 - 36 = 46$$

Ans ✗ A. 16 and 36

✗ B. 8 and 36

✗ C. 20 and 36

✓ D. 8 and 4

Question ID : 1841223514

Q.10 Three statements are given, followed by two conclusions numbered I and II. Assuming the statements to be true, even if they seem to be at variance with commonly known facts, decide which of the conclusions logically follow(s) from the statements.

Statement:

All posts are e-mails.

Some posts are letters.

All emails are telephones.

Conclusions:

I. Some telephones are letters.

II. No email is letter.

Ans A. Both conclusions I and II follow

B. Only Conclusion I follows

C. Only Conclusion II follows

D. Either conclusion I or II follows

Question ID : 1841223497

Q.11 If A + B means 'A is the father of B'
A @ B means 'A is the brother of B'
A # B means 'A is the wife of B'

If N + U @ M # C + G @ K, then how is M related to K?

Ans A. Mother

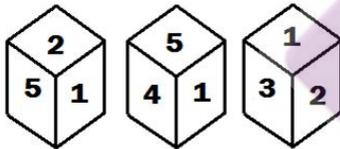

B. Niece

C. Daughter

D. Sister

Question ID : 1841223504

Q.12 Three different positions of the same dice are shown, the six faces of which are numbered from 1 to 6. Select the number that will be on the face opposite to the one showing '5'.

Ans A. 3

B. 2

C. 6

D. 4

Question ID : 1841223512

Q.13 Vishal is standing in a park facing the east direction. Then he turns 145 degree anticlockwise. After that he turns 90 degree anticlockwise. Which direction is he facing now?

Ans A. South-west

B. North-west

C. South-east

D. North-east

Question ID : 1841223502

Q.14 Sarla is the mother of Kubra. Sankalp is the son of Manoj. Vinay's only son Manoj is Kubra's brother. Yukta's only sister Sarla is married to Vinay. How is Yukta related to Manoj?

- Ans
- A. Father's mother
 - B. Father's sister
 - C. Sister's mother
 - D. Mother's sister

Question ID : 1841223503

Q.15 How many numbers are there in the string of elements given below which are immediately preceded by a vowel and are immediately followed by a consonant? (Count from left to right)

4 A 6 D E 3 A 2 U 8 G 6 A S D 4 P 3 A 7 A 5 Q 2 E 3 A 4 T 6 E 7 U L 9 5 A 8 N 3 E 5 C 9 7 D 6 E 8 A

- Ans
- A. 8
 - B. 7
 - C. 5
 - D. 6

Question ID : 1841223500

Q.16 Select the correct mirror image of the given combination when the mirror is placed at 'PQ' as shown below.

F c R b s Z

- Ans
- A. F c R b s Z
 - B. F c R p s Z
 - C. F c R p s Z
 - D. Z c R p s F

Question ID : 1841223511

Q.17 Three of the following four number pairs are alike in some manner and one is different. Identify the one which is different.

- Ans
- A. 21 : 443
 - B. 18 : 322
 - C. 12 : 146
 - D. 15 : 227

Question ID : 1841223513

Q.18 Among six friends K, L, M, N, O and P; K scores more marks than P but lesser marks than N. M scores lesser marks than L. O scores the highest marks. Three persons scores more marks than N. Who scores the lowest marks?

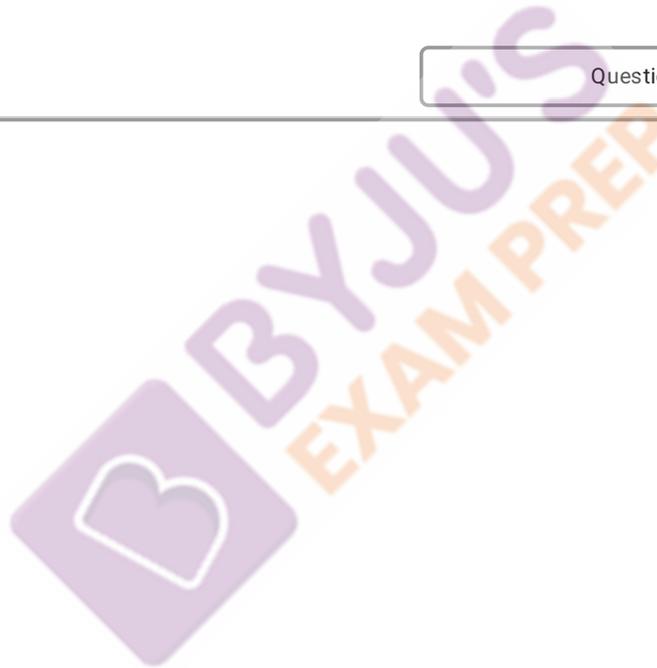

- Ans
- A. M
 - B. L
 - C. K
 - D. P

Question ID : 1841223495

Q.19 Five persons A, B, C, D and E attend class on one of the five days from Monday to Friday. On each day, one person attends the class. No class is held on Saturday and Sunday. D attends the class on Monday. E attends just after B. C does not attend the class on Tuesday. B is just after A. Who attends the class on Thursday?

- Ans
- A. B
 - B. A
 - C. C
 - D. E

Question ID : 1841223496

Q.20 Three of the following four option figures are similar in a certain manner while one is different. Choose the odd one out.

Ans

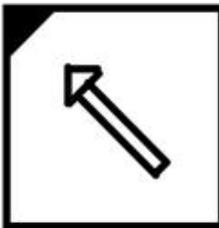

A.

B.

C.

D.

Question ID : 1841223509

Section : General Awareness

Q.1 Who among the following has been honored with DRDO's "Scientist of the Year Award" in 2020 for his contribution in developing several herbal medicines, including the popular drug Lukoskin meant for the treatment of leukoderma?

Ans A. Debdeep Mukhopadhyay

B. Saket Saurabh

C. Arun Kumar Shukla

D. Hemant Kumar Pandey

Question ID : 1841223515

Q.2 Which of the following features in the Indian constitution was borrowed from the constitution of France?

- Ans
- A. Method of election of President
 - B. Judicial review
 - C. Fundamental duties
 - D. Concept of Republic

Question ID : 1841223533

Q.3 In which year the Congress and the Muslim League signed the historic Lucknow Pact and decided to work together for representative government in the country?

- Ans
- A. 1916
 - B. 1915
 - C. 1919
 - D. 1920

Question ID : 1841223523

Q.4 Which of the following statements is CORRECT?

- Ans
- A. GPS has four segments.
 - B. GPS has five segments.
 - C. GPS has three segments.
 - D. GPS has two segments.

Question ID : 1841223517

Q.5 In which year the American astronaut, Neil Armstrong, landed on the moon for the first time?

- Ans
- A. 1971
 - B. 1968
 - C. 1970
 - D. 1969

Question ID : 1841223532

Q.6 Which of the following department / ministry has been allocated ₹18,264.89 crore under the Union Budget 2021-22?

- Ans
- A. The Department of Atomic Energy
 - B. The Ministry of Earth Sciences
 - C. The Ministry of Science and Technology
 - D. The Department of Science and Technology

Question ID : 1841223527

Q.7 In which year Timurid ancestry captured Delhi?

- Ans A. 1378
 B. 1388
 C. 1398.
 D. 1368

Question ID : 1841223522

Q.8 In which month and year Swarnjayanti Gram Swarozgar Yojana (SGSY) launched, aims at bringing the assisted poor families (Swarozgaris) above the poverty line by organizing them into Self Help Groups (SHGs) through a mix of Bank credit and Government subsidy?

- Ans A. May 2014
 B. October 1979
 C. March 1988
 D. April 1999

Question ID : 1841223519

Q.9 Who founded the Satyashodhak Samaj (Truth Seekers Society), which was devoted to securing human rights and social justice for low-caste people?

- Ans A. Savitri Bai Phule
 B. E.V. Ramasami Naickar
 C. Sri. Narayana Guru
 D. Jyotirao Govindrao Phule

Question ID : 1841223518

Q.10 Who holds the National record in 100 m race in women's category as of 2021?

- Ans A. P. T. Usha
 B. Dutee Chand
 C. Saraswati Saha
 D. Hima Das

Question ID : 1841223520

Q.11 In which year Sport Authority of India (SAI) was set up by the Government of India?

- Ans A. 1980
 B. 1984
 C. 1972
 D. 1976

Question ID : 1841223521

Q.12 What is India's rank in coal production in the world as of 2020?

- Ans A. Second
 B. Fourth
 C. Third
 D. Eighth

Question ID : 1841223531

Q.13 How many Scheduled Private Sector Banks are in India as of January 2022?

- Ans A. 20
 B. 18
 C. 24
 D. 22

Question ID : 1841223528

Q.14 How many parallel ranges are in the longitudinal extent of Himalaya?

- Ans A. Five
 B. Three
 C. Six
 D. Four

Question ID : 1841223529

Q.15 In how many phases the Indian National Census 2011 has been conducted?

- Ans A. Three
 B. Four
 C. One
 D. Two

Question ID : 1841223530

Q.16 Which of the following Bihu is also known as Rangali Bihu in Assam?

- Ans A. Kati Bihu
 B. Bohag Bihu
 C. Magh Bihu
 D. Kongali Bihu

Question ID : 1841223526

Q.17 Which one is an immutable data type in Python?

- Ans A. List
 B. Tuple
 C. Dictionary
 D. Set

Question ID : 1841223516

Q.18 In which of the following places the K. M. Music Conservatory located?

- Ans A. Chennai
 B. Madurai
 C. Kolkata
 D. Bengaluru

Question ID : 1841223525

Q.19 In which Articles of the Indian constitution the constitutional body, Finance commission is included?

- Ans A. Article 155
 B. Article 280
 C. Article 98
 D. Article 324

Question ID : 1841223534

Q.20 Which of the following stupas are located in Sarnath?

- Ans A. Maha and Chakhundi
 B. Dhamekh and Shanti
 C. Maha and Dhamekh
 D. Dhamekh and Chakhundi

Question ID : 1841223524

Section : Arithmetic Ability

Q.1 Number of students who have opted for subjects English, Mathematics and History are 36, 42 and 54 respectively. The examination is to be conducted for these students such that only the students of the same subject are allowed in one room and the number of students in each room is the same. What is the minimum number of rooms that should be arranged to meet all these conditions?

- Ans A. 18
 B. 12
 C. 22
 D. 6

Question ID : 1841223536

Q.2 The cost price of 30 articles is the same as the selling price of x articles. If the profit is 50%, then the value of x is:

- Ans A. 20
 B. 30
 C. 25
 D. 10

Question ID : 1841223541

Q.3 Approximately how many hours a day should 40 men work to complete the job in 20 days, if thirty men take 20 days to complete a job working 9 hours a day?

- Ans
- A. 5.30 hours
 - B. 6.75 hours
 - C. 8.15 hours
 - D. 9 hours

Question ID : 1841223545

Q.4 Akash alone can do a piece of work in 6 days and Bina alone in 8 days. Akash and Bina undertook to do it for ₹6,400. With the help of Dheeraj, they completed the work in 3 days. What is the difference between Akash's payment and Dheeraj's payment?

- Ans
- A. ₹2,400
 - B. ₹3,200
 - C. ₹4,000
 - D. ₹2,800

Question ID : 1841223546

Q.5 Train A, 800 m long is running at 80 kmph will take how much time to cross a man sitting in another train which is 400 m long, running at 64 kmph in the opposite direction?

- Ans
- A. 15 sec
 - B. 25 sec
 - C. 20 sec
 - D. 18 sec

Question ID : 1841223547

Q.6 In a mixture of 120 litres, the ratio of milk and water 2 : 1. If this ratio is to be 1 : 2, then the quantity of water to be further added is:

- Ans
- A. 80 L
 - B. 100 L
 - C. 120 L
 - D. 60 L

Question ID : 1841223540

Q.7 Simplify: $4 (10 + 15 \div 5 \times 4 - 2 \times 2) \div (42 \div 2 + 3 \times 3 - 22)$

- Ans
- A. 9
 - B. 8.5
 - C. 7
 - D. 8

Question ID : 1841223538

Q.8 ABCD is a square of 40 cm. What is the area of the least-sized square that can be inscribed in it with its vertices on the sides of ABCD?

- Ans
- A. 600 cm^2
 - B. 800 cm^2
 - C. 400 cm^2
 - D. 500 cm^2

Question ID : 1841223550

Q.9 Three years ago, the average of A, B, and C was 27 years and that of B and C 5 years ago was 20 years. A's age five years later is:

- Ans
- A. 45
 - B. 50
 - C. 40
 - D. 35

Question ID : 1841223549

Q.10 Observe the table and answer the question given below.

Profit Margin	2014	2015
Leather	10%	8%
Paper	12%	10%
Pharma	15%	12%
Technology	24%	28%

What is the year over year percent increase or decrease in the profit?

- Ans
- A. 3% decrease
 - B. 5% increase
 - C. 3% increase
 - D. 6% increase

Question ID : 1841223552

Q.11 A hemispherical bowl of diameter 16 cm is full of ice cream. Each student in a class is served exactly 6 scoops of ice cream. If the hemispherical scoop is having a radius of 2 cm, then ice cream is served to approximately how many students?

- Ans
- A. 13 students
 - B. 10 students
 - C. 12 students
 - D. 8 students

Question ID : 1841223551

Q.12 Observe the table and answer the question given below.

Profit Margin	2014	2015
Leather	10%	8%
Paper	12%	10%
Pharma	15%	12%
Technology	24%	28%

If the cost of leather products and paper to the manufacturer was ₹1,20,000 each was their joint profit% in the year 2014?

- Ans A. 11%
 B. 22%
 C. 17%
 D. 9%

Question ID : 1841223553

Q.13 The difference between the place value of the underlined digit in the two numbers 11.381 and 53.31 is _____.

- Ans A. 49.92
 B. 40.92
 C. 42.00
 D. 49.20

Question ID : 1841223535

Q.14 A vendor bought toffees at 7 for a rupee. How many for a rupee must he sell to gain 40%?

- Ans A. 3
 B. 6
 C. 5
 D. 4

Question ID : 1841223542

Q.15 The average of 7 terms is 52 and the 1st term is $\frac{1}{3}$ of the remaining terms. What will be the first number?

- Ans A. 52
 B. 24
 C. 36
 D. 91

Question ID : 1841223548

Q.16 The Simple Interest on a sum of money is 16% of the principal, and the rate per annum is equal to the number of years. Find the rate percent.

- Ans A. 4%
 B. 8%
 C. 5%
 D. 6%

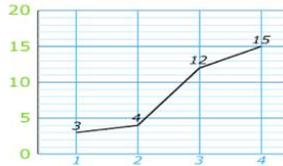

Question ID : 1841223543

Q.17 Two students A and B appeared at an examination. A secured 9 marks more than B and his marks was 64% of the sum of their marks. The marks obtained by A are: (round off to one decimal place)

- Ans A. 11.5
 B. 21.5
 C. 20.6
 D. 19.5

Question ID : 1841223539

Q.18 The X axis shows the number of years of Karan's service in a company and the Y axis shows his salary in thousands. Observe the graph given below and answer based on it.

What is the percentage increase in Karan's salary from the first year to the fourth year?

- Ans A. 300%
 B. 400%
 C. 500%
 D. 200%

Question ID : 1841223554

Q.19 Mr. Mohan invests ₹15,000 for 3 years at 5% p.a. compounded interest reckoned yearly. Income tax at the rate of 20% on the interest earned is deducted at the end of each year. Find the amount he receives at the end of third year. (rounded off to the nearest integer)

- Ans A. ₹16,400
 B. ₹16,000
 C. ₹16,457
 D. ₹17,457

Question ID : 1841223544

Q.20 What will be the sum when, the largest 4 digit number from 9944, 9900, 9988, 9999 exactly divisible by 88, is added to the smallest 3-digit natural number divisible by 6?

- Ans A. 10,064
 B. 99,460
 C. 10,046
 D. 10,406

Question ID : 1841223537

Q.1 Select the most appropriate option to fill in the blank.

The government will soon _____ the scheme of free ration at the door for the people living below poverty line.

- Ans A. perform
 B. implement
 C. practice
 D. fulfill

Question ID : 1841223569

Q.2 Select the most appropriate option to fill in the blank.

I don't know _____ you would like my suggestion. But the _____ is bad and you shouldn't go out at this time of the night.

- Ans A. Weather; weather
 B. Weather; whether
 C. Whether; weather
 D. Whether; whether

Question ID : 1841223561

Q.3 Select the most appropriate option to fill in the blank.

The tiger growled _____ at the herd of deer.

- Ans A. ferociously
 B. ferociousness
 C. ferocious
 D. ferocity

Question ID : 1841223556

Q.4 Select the most appropriate option to fill in the blank.

The captain _____ the ship only after everybody was safely in the life boat.

- Ans A. was leaving
 B. left
 C. leaves
 D. is leaving

 D. was in the garden

Question ID : 1841223565

Q.14 Select the most appropriate option to fill in the blank.

Please refrain _____ drinking coffee for a week.

- Ans A. of
 B. from
 C. for
 D. with

Question ID : 1841223555

Q.15 Select the most appropriate synonym of the given word.

TRANQUIL

- Ans A. peaceful
 B. nervous
 C. stormy
 D. excited

Question ID : 1841223559

Comprehension:

Read the following passage and answer the questions given after it.

Ötzi's discovery ranks as one of the greatest archaeological finds of the 20th century. Ötzi the Iceman is the well-preserved, 5,300-year-old mummy that caused an international sensation when it was dug out of a glacier high in the Italian Alps in 1991.

Since that time, the naturally mummified individual - whom the press named Ötzi because he was found in the mountains above the Ötztal Valley - has continued to attract intense public interest and professional scrutiny as the man's mummified remains, the clothes he wore and the implements he carried have been studied over the past few decades.

"He is so important because, for the first time, we have the possibility of knowing a Copper Age individual who died in the same situation as he had lived," said Katharina Hersel, a spokesperson for the South Tyrol Museum of Archaeology in Bolzano, Italy, where Ötzi is housed.

Ötzi the Iceman was found by two German hikers who were making their way across the Tisenjoch Pass at an elevation of 10,530 feet (3,210 meters) above the Ötztal Valley in western Austria in September 1991. The hikers were skirting a glacier on the border of Austria and Italy when they noticed the upper part of a human body protruding from the ice. That summer had been particularly warm, Hersel said, and the high temperatures aided in exposing Ötzi's remains. The German hikers alerted the Austrian authorities, who, at first, thought the body was the victim of an unfortunate mountaineering accident. This assumption prompted a hasty attempt to extract the body from the ice the following day. The rescuers, none of them trained archaeologists, tried to dig Ötzi out of the ice using axes and jackhammers. In the process, parts of the mummy - including the left hip and thigh and a few of his tools, including his bow - were damaged. Bad weather scuttled this first attempt to free the body from the ice, so the authorities tried again the next day. The rescue attempt took longer than anticipated, but five days after Ötzi's discovery, the mummy was freed from the ice and fully exposed.

A helicopter carried the mummy off the mountain, and the iceman was transported to the Institute of Forensic Medicine at Innsbruck Medical University in Austria. There, Konrad Spindler, an archaeologist at the University of Innsbruck, examined the remains and announced that the mummy was not a mountaineer but was "at least 4,000 years old," Scientific American reported.

SubQuestion No : 16

Q.16 The central theme of the passage is:

- Ans
- A. mummification of Otzi, the Iceman
 - B. importance of Otzi, the Iceman
 - C. discovery of Otzi, the Iceman
 - D. preservation of Otzi, the Iceman

Question ID : 1841223571

Comprehension:

Read the following passage and answer the questions given after it.

Ötzi's discovery ranks as one of the greatest archaeological finds of the 20th century. Ötzi the Iceman is the well-preserved, 5,300-year-old mummy that caused an international sensation when it was dug out of a glacier high in the Italian Alps in 1991.

In the process, parts of the mummy - including the left hip and thigh and a few of his tools, including his bow - were damaged. Bad weather scuttled this first attempt to free the body from the ice, so the authorities tried again the next day. The rescue attempt took longer than anticipated, but five days after Ötzi's discovery, the mummy was freed from the ice and fully exposed.

A helicopter carried the mummy off the mountain, and the iceman was transported to the Institute of Forensic Medicine at Innsbruck Medical University in Austria. There, Konrad Spindler, an archaeologist at the University of Innsbruck, examined the remains and announced that the mummy was not a mountaineer but was "at least 4,000 years old," Scientific American reported.

SubQuestion No : 17

Q.17 The finding of Otzi is archeologically important because:

- a. The body is well preserved.
- b. It is a naturally mummified individual.
- c. It is 5,300 years old.
- d. It was found at an elevation of 10,530 feet.

Which of the above reasons are correct?

- Ans
- A. a, b and c
 - B. a, b and d
 - C. a, c and d
 - D. b, c and d

Question ID : 1841223572

Comprehension:

Read the following passage and answer the questions given after it.

Ötzi's discovery ranks as one of the greatest archaeological finds of the 20th century. Ötzi the Iceman is the well-preserved, 5,300-year-old mummy that caused an international sensation when it was dug out of a glacier high in the Italian Alps in 1991.

Since that time, the naturally mummified individual - whom the press named Ötzi because he was found in the mountains above the Ötztal Valley - has continued to attract intense public interest and professional scrutiny as the man's mummified remains, the clothes he wore and the implements he carried have been studied over the past few decades.

"He is so important because, for the first time, we have the possibility of knowing a Copper Age individual who died in the same situation as he had lived," said Katharina Hersel, a spokesperson for the South Tyrol Museum of Archaeology in Bolzano, Italy, where Ötzi is housed.

Ötzi the Iceman was found by two German hikers who were making their way across the Tisenjoch Pass at an elevation of 10,530 feet (3,210 meters) above the Ötztal Valley in western Austria in September 1991. The hikers were skirting a glacier on the border of Austria and Italy when they noticed the upper part of a human body protruding from the ice. That summer had been particularly warm, Hersel said, and the high temperatures aided in exposing Ötzi's remains. The German hikers alerted the Austrian authorities, who, at first, thought the body was the victim of an unfortunate mountaineering accident. This assumption prompted a hasty attempt to extract the body from the ice the following day. The rescuers, none of them trained archaeologists, tried to dig Ötzi out of the ice using axes and jackhammers. In the process, parts of the mummy - including the left hip and thigh and a few of his tools, including his bow - were damaged. Bad weather scuttled this first attempt to free the body from the ice, so the authorities tried again the next day. The rescue attempt took longer than anticipated, but five days after Ötzi's discovery, the mummy was freed from the ice and fully exposed.

A helicopter carried the mummy off the mountain, and the iceman was transported to the Institute of Forensic Medicine at Innsbruck Medical University in Austria. There, Konrad Spindler, an archaeologist at the University of Innsbruck, examined the remains and announced that the mummy was not a mountaineer but was "at least 4,000 years old," Scientific American reported.

SubQuestion No : 18

Q.18 The body of Otzi and his tools were damaged mainly because:

- Ans
- A. the bad weather caused delay in extracting the body
 - B. he had been a victim of an accident
 - C. the untrained rescuers used jackhammers and axes
 - D. the hikers tried to extract him out of the ice

Question ID : 1841223574

Comprehension:

Read the following passage and answer the questions given after it.

Ötzi's discovery ranks as one of the greatest archaeological finds of the 20th century. Ötzi the Iceman is the well-preserved, 5,300-year-old mummy that caused an international sensation when it was dug out of a glacier high in the Italian Alps in 1991.

Q.11 Consider the below statements with respect to "Power transmission devices used to transmit power from one shaft to another" and Identify the correct answer.

Statement A: Belt drives are used where exact velocity ratio is not required.

Statement B: The chain drive is considered as positive drive as no slip is observed during power transmission.

- Ans
- A. Both statements are incorrect
 - B. Statement B is correct and A is incorrect
 - C. Both statements are correct
 - D. Statement A is correct and B is incorrect

Question ID : 1841223615

Q.12 Consider the below statements with respect to dry corrosion of metals and identify correct answer.

Statement A: Dry corrosion occurs usually in the presence of gases and vapours

Statement B: Dry corrosion occurs mainly at high temperatures in the absence of moisture.

- Ans
- A. Both statements are incorrect
 - B. Both statements are correct
 - C. Statement B is correct and A is incorrect
 - D. Statement A is correct and B is incorrect

Question ID : 1841223602

Q.13 Consider the below statements with respect to 'Ohm law applicable for conductors' and Identify the correct answer.

Statement A: It does not hold true for nonlinear devices such as semiconductors and zener diodes.

Statement B: It is not applicable to non metallic conductors, such as silicon carbide.

- Ans
- A. Both statements are correct
 - B. Statement A is correct and B is incorrect
 - C. Statement B is correct and A is incorrect
 - D. Both statements are incorrect

Question ID : 1841223612

Q.14 Coulomb's law states that:

- Ans
- A. the force of attraction or repulsion acting along a straight line between two electric charges is directly proportional to the sum of the charges and inversely to the distance between them.
 - B. the force of attraction or repulsion acting along a straight line between two electric charges is directly proportional to the product of the charges and inversely to the square of the distance between them.
 - C. the force of attraction or repulsion acting along a straight line between two electric charges is directly proportional to the square of the product of charges and inversely to the distance between them.
 - D. the force of attraction or repulsion acting along a straight line between two electric charges is inversely proportional to the product of the charges and directly to the square of the distance between them.

Question ID : 1841223597

Q.15 A block of weight 600 N resting on a horizontal surface is subjected to a horizontal push of 300 N force, calculate the friction force developed at the contact surface, if the coefficient of friction between two materials is 0.3.

- Ans A. 210 N
 B. 180 N
 C. 90 N
 D. 250 N

Question ID : 1841223611

Q.16 Identify the incorrect statement with respect to classification of boilers according to location of furnace.

- Ans A. Option boiler is a internally fired boiler
 B. Lancashire boiler is a externally fired boiler
 C. Cornish boiler is a internally fired boiler
 D. Bobcock and Wilcox boilers are externally fired boilers

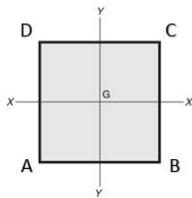

Question ID : 1841223616

Q.17 Rectilinear motion of a particle is defined by the relation $x = 2t^3 - 3t^2 + 10t - 5$. Calculate the acceleration when time (t) = 3 sec. consider that value ' x ' is measure in meters.

- Ans A. 30 m/sec
 B. 14 m/sec
 C. 52 m/sec
 D. 46 m/sec

Question ID : 1841223608

Q.18 A rectangular lamina having base width $AB = 5$ mm and depth $BC = 10$ mm is as shown in below figure. Calculate its moment of inertia about its base AB .

- Ans A. 1244.88 mm⁴
 B. 956.78 mm⁴
 C. 1834.77 mm⁴
 D. 1666.66 mm⁴

Question ID : 1841223607

Q.19 Which of the following is the correct expression for the calculation of centrifugal force (F) experienced by an object during its curvilinear motion. Where, w = Weight of revolving object, v = velocity at radius 'r' on body, g = acceleration due to gravity, r = perpendicular distance from axis of rotation to centre of gravity of revolving object.

Ans

A. $F = \frac{v^2}{gr}$

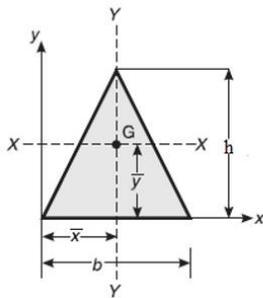

B. $F = \frac{wv}{gr^2}$

C. $F = \frac{wv^2}{gr}$

D. $F = \frac{wv^2}{gr^2}$

Question ID : 1841223609

Q.20 A triangular lamina with base width $b = 30$ mm and height $h = 50$ mm is as shown in below figure. The location of centroid measured with respect to its apex is at a distance of ____ mm.

- Ans
- A. 41.32 mm
 - B. 25.00 mm
 - C. 16.66 mm
 - D. 33.33 mm

Question ID : 1841223606

Section : Discipline2

Q.1 Arbitrary value given by Slitcher for Radius of influence for Unconfined aquifer is:

- Ans
- A. 75 m
 - B. 600 m
 - C. 150 m
 - D. 300 m

Question ID : 1841223626

Q.2 The vacuum gauge connected to the chamber measures a reading of 60 kPa and atmospheric pressure at that point is 150 kPa, The absolute pressure of chamber is

-
- Ans A. 60 kPa
 B. 210 kPa
 C. 150 kPa
 D. 90 kPa

Question ID : 1841223629

Q.3 Which of the following is not the product of hydration of ordinary Portland cement?

- Ans A. Tetracalcium Aluminoferrite
 B. Calcium Decahydrate
 C. Di-calcium Silicate
 D. Calcium Hydroxide

Question ID : 1841223635

Q.4 In making a concrete sample 0.45 water cement ratio was adopted. What happens, if the said water cement ratio is increased and other variables are kept constant, for a given volume of concrete?

- Ans A. Strength concrete decreases
 B. Workability of concrete decreases
 C. Strength of concrete increases
 D. Change of water cement ratio doesnot affect the hardened and fresh concrete properties

Question ID : 1841223636

Q.5 Which of the following data item is not broken down into smaller units is?

- Ans A. Meta data
 B. Elementary data item
 C. Database management
 D. Data entry

Question ID : 1841223633

Q.6 As per IS 8112 - 2013, If the initial setting time of ordinary Portland cement-grade 43 is _____ such cement should be rejected.

- Ans A. 45 minutes
 B. 25 minutes
 C. 55 minutes
 D. 35 minutes

Question ID : 1841223634

Q.7 "Dormitories" belongs to which subgroup, Under Classification of Group A buildings by National Building code of india.

- Ans
- A. Sub-group A-4
 - B. Sub-group A-3
 - C. Sub-group A-5
 - D. Sub-group A-1

Question ID : 1841223618

Q.8 In what type of scaffolding the working platform is supported on movable contrivances like ladders, tripods mounted on wheels?

- Ans
- A. Patented Scaffolding
 - B. Needle Scaffolding
 - C. Trestle Scaffolding
 - D. Suspended Scaffolding

Question ID : 1841223622

Q.9 If the Reynolds number is more than 4000 in a pipe flow, then the flow is called as:

- Ans
- A. Irrotational Flow
 - B. Turbulent Flow
 - C. Translational Flow
 - D. Laminar Flow

Question ID : 1841223630

Q.10 When a fluid is at rest, rate of increase of pressure in a vertical direction is equal to the weight density at that point is called as:

- Ans
- A. Hydro Dynamic Law
 - B. Pressure Dynamic Law
 - C. Hydro Static Law
 - D. Pressure Static Law

Question ID : 1841223628

Q.11 Calculate the Specific Weight of a liquid in N/m^3 , if the weight of said liquid is 8 N for a volume of 0.5 litre.

- Ans
- A. 4000
 - B. 8000
 - C. 2000
 - D. 16000

Question ID : 1841223627

Q.12 The inner curve of an arched masonry is called as _____.

- Ans
- A. Arcade
 - B. Base line
 - C. Voussoirs
 - D. Intrados

Question ID : 1841223621

Q.13 What operation the ALU of computer performs?

- Ans
- A. Arithmetic
 - B. Logarithmic
 - C. Geometric
 - D. Biometric

Question ID : 1841223632

Q.14 The type of closer used in masonry work obtained by cutting a triangular portion of the brick such that half a header and half a stretcher are obtained on the adjoining cut faces is:

- Ans
- A. Mitred closer
 - B. Bevelled closer
 - C. King closer
 - D. Queen closer

Question ID : 1841223619

Q.15 One stroke in Internal Combustion (IC) engines is equal to _____.

- Ans
- A. 0.5 times the crank radius
 - B. 1 times the crank radius
 - C. 2 times the crank radius
 - D. 4 times the crank radius

Question ID : 1841223617

Q.16 The Gross command area of an Irrigation canal is 60000 hectares out of which 80% is Cultivable Command area. The canal Intensity of Irrigation for Rabi season is 60% and for Kharif season of 30%. Then the Crop Ratio will be:

- Ans
- A. 2.667
 - B. 1.333
 - C. 1.986
 - D. 0.500

Question ID : 1841223625

Q.17 Identify the correct statement regarding most economical rectangular channel.

- Ans A. Hydraulic depth is half the depth of flow
 B. Width is half the depth of flow
 C. Width is $3/4^{\text{th}}$ the depth of flow
 D. Hydraulic depth is $3/4^{\text{th}}$ the depth of flow

Question ID : 1841223631

Q.18 Which of the following method of Irrigation is most suitable method for Steep land /Terrain?

- Ans A. Check Flooding
 B. Basin Flooding
 C. Border Flooding
 D. Free Flooding

Question ID : 1841223623

Q.19 Identify the Dicken's formula used for estimating the Flood Discharge (Q).

- Ans A. $Q=CA^{3/4}$, where A is the catchment area and C is flood coefficient.
 B. $Q = 123A^{1/2}$, where A is the catchment area.
 C. $Q = CA^{5/6}$, where A is the catchment area and C is flood coefficient.
 D. $Q = CA^{2/3}$, where A is the catchment area and C is flood coefficient.

Question ID : 1841223624

Q.20 In the chemical method for underpinning foundations, which of the following solution is injected in water after pipes are driven?

- Ans A. Sodium Silicate
 B. Calcium Silicate
 C. Sulphate
 D. Magnesium Silicate

Question ID : 1841223620

Section : Discipline 3

Q.1 Which among the following factor increases the rate of demand in the consumption of water.

- Ans A. Stable community
 B. Increased water rates
 C. High pressure in the system
 D. Intermittent supply

Question ID : 1841223649

Q.2 As per IS 10500 : 2012, What is the permissible limit for the sulphate content (as SO_4 in mg/l) present in drinking water in the absence of alternate source?

- Ans A. 500 mg/l
 B. 600 mg/l
 C. 400 mg/l
 D. 200 mg/l

Question ID : 1841223652

Q.3 Schmutzdecke is a surface coating formed in which type of filter in filtration process?

- Ans A. Mixed Media Filter
 B. Slow Sand Filter
 C. Dual Media Filter
 D. Rapid Sand Filter

Question ID : 1841223654

Q.4 Calculate the bulk modulus of a material, whose young's modulus is 120 Gpa and poisson's ratio 0.25.

- Ans A. 100 Gpa
 B. 60 Gpa
 C. 80 Gpa
 D. 40 Gpa

Question ID : 1841223642

Q.5 Identify the correct statement with respect to various types of admixtures used in making concrete.

- Ans A. Addition of Superplasticizers in making concrete decreases the workability of concrete for a given water cement ratio.
 B. Use of retarders in making concrete allows the concrete to increase the rate of early strength development in concrete
 C. Accelerating admixtures are added to allow the concrete to be plastic and workable for a longer time than concrete without accelerators.
 D. Addition of Superplasticizers in making concrete decreases the water cement ratio required to attain a particular degree of workability.

Question ID : 1841223641

Q.6 Socket and spigot are absent in which of the following joint used in the joints of Sewer pipes.

- Ans A. Tyton Joint
 B. Viking Johnson Coupling Joint
 C. Expansion Joint
 D. Socket and Spigot Joint

Question ID : 1841223651

Q.7 A city has a supply of 15000 cubic meters of water per day is treated with a chlorine dosage of 0.5 ppm. For this purpose, the requirement of 25% bleaching powder per day would be.

- Ans A. 45 kg
 B. 30 kg
 C. 15 kg
 D. 90 kg

Question ID : 1841223655

Q.8 Which of the following is not the natural light weight aggregate used in making light weight concrete?

- Ans A. Perlite
 B. Scoria
 C. Diatomite
 D. Pumice

Question ID : 1841223639

Q.9 Consider below statements with respect to shear stress distribution in T sections and identify correct answer.

Statement A: Shear stress developed in any T section will always be maximum at the junction of flange and web.

Statement B: Shear stress developed in a T section will be maximum at its neutral axis.

- Ans A. Statement A is correct and B is incorrect
 B. Statement B is correct and A is incorrect
 C. Both statements are incorrect
 D. Both statements are correct

Question ID : 1841223645

Q.10 Consider below statements with respect to workability of concrete and identify correct answer.

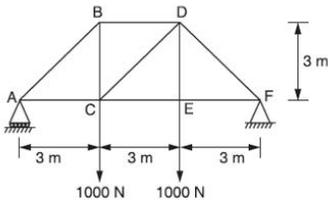

Statement A: For a given quantity of water and paste, smaller size of coarse aggregates will give higher workability.

Statement B: Lower aggregate cement ratio make the concrete mix cohesive and fatty to give better workability

- Ans A. Both statements are correct
 B. Statement B is correct and A is incorrect
 C. Both statements are incorrect
 D. Statement A is correct and B is incorrect

Question ID : 1841223640

Q.11 Identify the type of truss shown in below figure based on degree of redundancy. Consider that truss is supported with roller type at A and hinged type at F.

- Ans A. Deficient truss
 B. Perfect truss
 C. Over rigid truss
 D. Redundant truss

Question ID : 1841223648

Q.12 Consider below statements with respect to sulfate attack on cement concrete and identify correct answer.

Statement A: Expansion of cement paste takes place in concrete due to sulfate attack on concrete.

Statement B: Calcium aluminate hydrate can react with sulfate salts and produce calcium sulfo aluminate.

- Ans A. Statement A is correct and B is incorrect
 B. Both statements are correct
 C. Both statements are incorrect
 D. Statement B is correct and A is incorrect

Question ID : 1841223638

Q.13 A cantilever beam of length 4 m carries a gradually varying load, with an intensity zero at free end (B) to 3 kN/m at fixed end (A). Calculate the magnitude of bending moment at A.

- Ans A. 2 kN-m
 B. 4 kN-m
 C. 8 kN-m
 D. 6 kN-m

Question ID : 1841223643

Q.14 A rectangular strut of width 150 mm and thickness 120 mm carries a load of 180 kN. Calculate the maximum stress in the section if the load is eccentric by 20 mm in the direction of width and concentric in the direction of thickness. Consider that the direct stress due to applied load as 10N/mm^2 and stress due to eccentric loading as 4N/mm^2 . Ignore the self weight of the strut.

- Ans A. 18 MPa
 B. 16 MPa
 C. 10 MPa
 D. 12 MPa

Question ID : 1841223646

Q.15 In the design of a sedimentation tank, a flow of 5 MLD occurs. If the surface loading rate is to be 2 liters/day/cm², calculate the surface area of basin in m².

- Ans A. 25000
 B. 250
 C. 2500
 D. 25

Question ID : 1841223653

Q.16 The most suitable type of Distribution system in which main pipe lines are provided around the area i.e., peripherally for a town or area having well planned streets and roads is?

- Ans A. Reticulation System
 B. Grid-Iron System
 C. Circular System
 D. Dead End System

Question ID : 1841223656

Q.17 Calculate the power transmitted by a solid circular shaft of diameter 100 mm, if the average torque transmitted by the shaft is 8 kN-m at a speed of 150 rpm.

- Ans A. 35π kW
 B. 30π kW
 C. 40π kW
 D. 25π kW

Question ID : 1841223647

Q.18 Which of the following method is more suitable for transportation of concrete in highrise construction projects and fast too?

- Ans A. Belt conveyors
 B. Crane with bucket and rope
 C. Chute
 D. Dumpers

Question ID : 1841223637

Q.19 An Impermeable Geologic formation which neither contains water nor transmits water is:

- Ans A. Aquiclude
 B. Aquitard
 C. Aquifer
 D. Aquifuge

Question ID : 1841223650

Q.20 A rectangular beam 200 mm wide and 400 mm deep is simply supported over a span of 5 meters. If the beam is subjected to a uniformly distributed load of 4 kN/m, find the section modulus of the beam.

- Ans
- A. $5.33 \times 10^6 \text{ mm}^3$
 - B. $6.75 \times 10^6 \text{ mm}^3$
 - C. $3.56 \times 10^6 \text{ mm}^3$
 - D. $4.16 \times 10^6 \text{ mm}^3$

Question ID : 1841223644

Section : Discipline 4

Q.1 Which of the following command is used In AutoCADD for opening a new drawing tab?

- Ans
- A. Ctrl + E
 - B. Ctrl + N
 - C. Ctrl + W
 - D. Ctrl + S

Question ID : 1841223672

Q.2 As per recommendations of National Building organization of India, for small sewers with 100 mm diameter, what is the gradient required to generate the self cleaning velocity?

- Ans
- A. 1 in 120
 - B. 1 in 30
 - C. 1 in 90
 - D. 1 in 60

Question ID : 1841223657

Q.3 A soil sample has its porosity 30%, calculate its void ratio.

- Ans
- A. 0.667
 - B. 0.176
 - C. 0.285
 - D. 0.428

Question ID : 1841223659

Q.4 According to IRC, In the design of curves on urban road stretches with frequent intersections, the limiting super elevation considered will be:

- Ans
- A. 20%
 - B. 10%
 - C. 7%
 - D. 4%

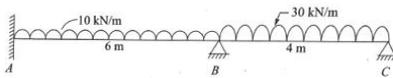

Question ID : 1841223675

Q.5 According to IS soil classification, Silty soil has:

- Ans A. Particles Larger than 75 micron Sieve and exhibits larger strength when air dried
 B. Particles smaller than 75 micron Sieve and exhibits larger strength when air dried
 C. Particles smaller than 75 micron Sieve and exhibits little or no strength when air dried
 D. Particles Larger than 75 micron Sieve and exhibits little or no strength when air dried

Question ID : 1841223660

Q.6 Calculate the distribution factor for the member BA shown in below figure, consider that EI is constant through out its length ABC.

- Ans A. 0.2
 B. 0.35
 C. 0.47
 D. 0.58

Question ID : 1841223665

Q.7 According to Industrial dispute act 1947, no employer carrying on any public utility service shall strike or lock-out any of his workmen:

- Ans A. Within 48 days of giving such notice
 B. Within 25 days of giving such notice
 C. Within 14 days of giving such notice
 D. Within 20 days of giving such notice

Question ID : 1841223669

Q.8 Which of the following shortcut is used in AutoCADD for trimming geometry?

- Ans A. TM
 B. TR
 C. T
 D. TI

Question ID : 1841223673

Q.9 According to IS 18001 : 2007 code book, the Occupational health and safety, principle 1 Refers to:

- Ans A. Commitment and Policy
 B. Management review
 C. Implementation and operation
 D. Planning

Question ID : 1841223667

Q.10 Respect in Environmental ethics can be described as:

- Ans A. Willingness to show consideration for natural resources, wildlife, flora and fauna
 B. Willingness to show consideration for natural wildlife, flora and fauna only
 C. Willingness to show consideration for natural resources and wildlife only
 D. Willingness to show consideration for natural resources only

Question ID : 1841223671

Q.11 Which of the following test determines the hardness or softness of bitumen?

- Ans A. Penetration Test
 B. Flash Point Test
 C. Solubility Test
 D. Specific Gravity Test

Question ID : 1841223676

Q.12 Calculate the critical gradient at which quick sand condition occurs for a Coarse grained soil, which has a void ratio of 0.65 and specific gravity of 2.65.

- Ans A. 1.333
 B. 2.33
 C. 1
 D. 2.08

Question ID : 1841223661

Q.13 Consider below statements with respect to analysis of three hinged arches and identify correct answer.

Statement A: Any rise or fall in temperature develops huge temperature stresses in three hinged arches.

Statement B: Two hinged arch is more flexible when compared to a three hinged arch.

- Ans A. Both statements are incorrect
 B. Both statements are correct
 C. Statement B is correct and A is incorrect
 D. Statement A is correct and B is incorrect

Question ID : 1841223666

Q.14 Workman's compensation act 1923 came to force on _____.

- Ans A. 1st july 1924
 B. 21st july 1924
 C. 10th july 1924
 D. 12th july 1924

Question ID : 1841223668

Q.15 Which of the following test is known as Quick shear test?

- Ans A. Drained test
 B. Undrained test
 C. Unconsolidated drained test
 D. Consolidated drained test

Question ID : 1841223663

Q.16 Consider a beam AB with fixed end supports at both of its ends, the maximum number of support reactions which can develop in the said case is _____. Consider that the beam is subjected to an inclined force of magnitude P kN.

- Ans A. 6
 B. 3
 C. 5
 D. 4

Question ID : 1841223664

Q.17 Identify the external issue in the process of understanding the context of an organization according to ISO 9004 : 2018.

- Ans A. Resources
 B. Size and Complexity
 C. Innovation
 D. Natural Environment

Question ID : 1841223670

Q.18 What is the shape of front view if a circular surface plane is making 30 degrees with both Horizontal and vertical plane?

- Ans A. Oval
 B. Line
 C. Ellipse
 D. Circle

Question ID : 1841223674

Q.19 The most uniform soil deposit formed after transportation of soil is:

- Ans A. Shore Deposit
 B. Delta Deposit
 C. Wind Laid Deposit
 D. Glacial Deposit

Question ID : 1841223658

Q.20 Identify the Hough Compression index. (C_c) equation for precompressed soil, where, e_o is in-situ void ratio.

- Ans
- A. $C_c = 0.15 (e_o - 0.27)$
 - B. $C_c = 0.2 (e_o - 0.27)$
 - C. $C_c = 0.3 (e_o - 0.27)$
 - D. $C_c = 0.25 (e_o - 0.27)$

Question ID : 1841223662

Section : Discipline5

Q.1 To calculate the compressive strength of compression member, Imperfection factor considered for Buckling 'class d' is _____.

- Ans
- A. 0.21
 - B. 0.49
 - C. 0.34
 - D. 0.76

Question ID : 1841223691

Q.2 Consider below statements with respect to facing points of turnouts in railway crossings and identify correct answer.

Statement A: Trains pass over the Crossing first and then they pass over Switches.
Statement B: Trains pass over the switches first and then they pass over crossing.

- Ans
- A. Statement B is correct and A is incorrect
 - B. Statement A is correct and B is incorrect
 - C. Both statements are correct
 - D. Both statements are incorrect

Question ID : 1841223679

Q.3 Minimum thickness specified by IRC-78-2000 for well steining in bridge foundation is _____.

- Ans
- A. 600 mm
 - B. 300 mm
 - C. 500 mm
 - D. 400 mm

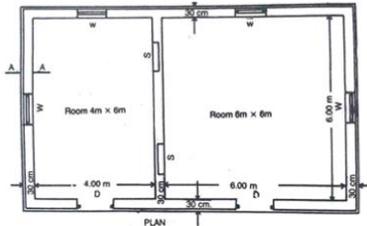

Question ID : 1841223680

Q.4 In a bolted connection, the ratio of net tensile area at root of threads to nominal plain shank area of bolt may be taken as _____ as per IS 1367 (Part-1) or in the absence of proof table

- Ans A. 0.88
 B. 0.87
 C. 0.68
 D. 0.78

Question ID : 1841223688

Q.5 Quantity of different items of work in a two roomed building shown in below figure is to be estimated using centre line method. The number of joints to be considered for the computation is _____.

- Ans A. 3
 B. 2
 C. 1
 D. 4

Question ID : 1841223694

Q.6 What is the Sleeper density used in Indian railways for the main tracks _____? (Where M is Rail length in meters)

- Ans A. $M + 4$ to $M + 7$
 B. $M + 2$ to $M + 4$
 C. $M + 5$ to $M + 10$
 D. $M + 3$ to $M + 6$

Question ID : 1841223678

Q.7 The ductility factor considered for common structural steels exhibiting minimum specified ductility, while calculating effective net area in case of design of tension members will be _____.

- Ans A. 2
 B. 0
 C. 1
 D. 3

Question ID : 1841223689

Q.8 According to IS 800 - 2007, the effective length of prismatic compression member of unsupported length L is restrained against rotation and translation at both ends will be _____.

- Ans** A. $0.65L$
 B. $1.2L$
 C. $2L$
 D. $0.8L$

Question ID : 1841223690

Q.9 Identify the silicious rock based on chemical classification of Rocks.

- Ans** A. Marble
 B. Gneiss
 C. Laterite
 D. Dolomite

Question ID : 1841223681

Q.10 While conducting tension test on cement, load on the Briquette should be applied at:

- Ans** A. 0.13 times from both the edges
 B. One third from both the edges
 C. The centre
 D. Two third from both edges

Question ID : 1841223682

Q.11 A building requires 9 RCC columns of size 0.2 m breadth, 0.2 m thickness and 4 m height. Estimate the quantity of steel reinforcement required, if the steel reinforcement to be provided is 1.5% by their gross volume.

- Ans** A. 0.956 quintal
 B. 1.695 quintal
 C. 1.897 quintal
 D. 2.469 quintal

Question ID : 1841223695

Q.12 In which of the following case the lime slakes relatively in slow manner during Slaking of lime?

- Ans** A. Limes from fine grained stones and Dense lumpy lime
 B. Limes from fine grained stones and Pulverized lime
 C. Limes from Coarse grained stones and Dense lumpy lime
 D. Limes from Coarse grained stones and lumpy lime

Question ID : 1841223683

Q.13 Which of the following type of estimate works out the quantities of each item of work to arrive the cost?

- Ans A. Preliminary estimate
 B. Cube rate estimate
 C. Plinth area estimate
 D. Detailed estimate

Question ID : 1841223692

Q.14 According to IS-2062 for E 165 (Fe 290) grade of steel, the minimum elongation percentage is _____.
