IBPS PO Syllabus 2023 - Prelims & Mains

The questions that will be asked can be from any of the following mentioned exam syllabi. So go through the IBPS PO exam syllabus thoroughly which will give you a proper idea of the expected questions from each of the sections and help you perform well at IBPS PO selection process.

IBPS PO Quantitative Aptitude Syllabus

While Preliminary and Main exam will follow the same pattern, this means you'll get the maximum number of Data Interpretation questions in the Main phase now. We will now have a look at the topics that will be asked in the quant section in the exam along with their expected weightage.

1. Number Series

Topic Description	Expected number of Questions
• Questions may be based on various patterns like double step variation, arithmetic (difference/ multiplication/ division) based, square/ cube/ square root/ cube root based, mixed arithmetic operations based etc	• In almost shifts, 5 questions can be asked in the Prelims exam. • Less likely to be asked in the Main phase • A new type of questions can be asked as introduced in SBI PO examination

2. Simplification/ Approximation

Topic Description	Expected number of Questions
• The level of this topic is expected to be moderate • Questions will be based on basic BODMAS rules, percentages etc.	• 5 questions were asked in some shifts from this topic in the Prelims exam • Less likely to be asked in the Main phase

3. Quadratic Equations

Topic Description	Expected number of Questions
• Moderate level of questions expected • Questions are expected to be mostly factorization based and less of formula-based	• 5 questions in the prelims exam were asked • Will not be asked in the Main exam.

4. Data Interpretation

Topic Description	Expected number of Questions

• Questions will be asked from topics like - Line graph, Bar graph, Pie Chart, Radar Chart, Mixed charts, Tabular charts, Caselet charts, and Missing DI • Questions in the Main phase will be difficult and maybe asked in combination with arithmetic problems • Questions in Prelims phase will be comparatively easy but calculative • New types of charts can be asked in the main examination as introduced in SBI PO	• There were 2-3 sets, i.e. 10-15 questions of DI questions in Prelims phase • For the main phase, you can expect 4-5 sets of DI questions, which will be difficult as well as calculative

5. Arithmetic Problems

Topic Description	Expected number of Questions
• This will involve questions from topics like- Ratio & Proportion, Averages, Age-based problems, Percentages, Profit Loss & Discount, Mixture & Alligations, Simple & Compound Interest, Time Work & Wages, Speed Time & Distance, Boats & Streams, Probability, etc. • Level of questions is expected to be moderate and calculative • They can be asked in the form of Caselets or Data Interpretation	• 10 -15 questions were asked from the topics in the prelims phase • These topics are less likely to be asked in the Main phase individually. They may, however, be asked in combination with DI sets in this exam

6. Data Sufficiency

Topic Description	Expected number of Questions
• You can expect 3 statement based Data Sufficiency questions • This topic, however, will be asked in the Prelims or Main exam	• 5 questions can be expected in the Main exam

7. Quantity based Questions

Topic Description	Expected number of Questions
• Quantity based questions can be asked • Questions will be calculative and asked in either/both in Prelims or/and Main phase of the exam.	• You can expect 5 questions from this topic in the Prelims or Main exam
